

Emails subsequent to Town Hall Meeting 25th Nov (explanation in *italics*)

from: Michael Dawson  
to: Principal Planning Officer  
date: 26 November 2013 15:29  
subject: TGA - Town Hall Meeting 25 Nov

Dear Peter

Please find attached a copy of the picture showing the ferry protruding out of the structure on River Drive, mentioned yesterday at our meeting.

Please send me a copy of the drawing you referred to yesterday.

regards Mick Dawson

Hello – I attach a copy of the plan and a copy of the grant of planning permission to which this drawing refers.

I was invited to attend this meeting so I did not take any minutes

Best regards

Peter

Michael

I took no minutes as is customary at these informal meetings.  
For your record I am sure all would agree :

1. The Exec representatives of the Group accepted that the construction had been made legally as per drawings seen.
2. The Exec representatives accepted that Items 3 and 4 which had not been complied with by the building company previously had now been properly addressed.
3. Concern was expressed that the building as approved would be unfit for purpose ( eg not big enough to take in the Ferryboat ) but this was accompany problem until/ or if, additional construction was made.
4. Concern was expressed as to the fact that there had been rumours that the Company was preparing to apply for further Planning Permission for at least one more building of about the same size.

It was agreed that until Planning Permission was requested no other action or re-action could be made by the Council. Indeed, that if a request was made the final decision could end up being made by persons from outside the Borough.

Best Regards  
John

Cllr John Anglin,

Inappropriate Developments on the Riverside.

Thank you for the summary of the meeting of the 25th Nov. I agree that this is a reasonable record of the meeting. However, the TGA Committee members were made to understand by the current Chairman, Graeme Watson, that this would be a formal meeting 'standard meeting with structured protocols'. So far details of the meeting have been word of mouth only, as you say no records exist, which makes the dissemination of information to the wider membership difficult.

I would like to comment on your first point about drawings seen and have attached three images to help make this clear. First a sketch of the plans I think we were discussing at the meeting (image on the left) and second, a detail from the drawing, date stamped 5th Sept, provided by Principal Planning Officer. The photo of the structure completed in early September speaks for itself.

I have measured the structure concerned and it is a meter wider than the date stamped plan provided. Therefore the footings placed in 2001 must have been set a meter wider as well. An image was forwarded to Principal Planning Officer showing that the current structure is too short to accommodate the Nexus Ferry; not suitable for purpose?

I maintain that the existing construction has not been built to the plans as circulated by Principal Planning Officer. I am therefore requesting a copy of the plan presented at the November meeting as represented by my sketch. I am concerned that the planning department is about to allow a building that is not being constructed to an approved plan an occurrence of which I have personal experience.

This is an important issue to residents of the Riverside who need to be kept fully informed, particularly as it is understood that Mr Wilson or his representatives are currently in the pre-planning stage with the council regarding further works.

I believe therefore that any future meetings regarding this matter should be formal and recorded.

Yours sincerely  
Michael Dawson.

Mr Dawson – when did you get access to measure the structure on site ?

Regards

Principal Planning Officer

subject: TGA - Town Hall Meeting 25 Nov

Dear Peter,

I have sufficient skills in surveying to be able to measure the width of the structure without access to the site and can say with confidence that it is 13.20m wide give or take 0.05m. The towers are vertical and it would seem to me that it is reasonable to assume that the footings, laid in 2001, are the same width.

We still need to receive a copy of the date stamped approved drawing from 1996.

regards  
Michael Dawson

Mr Dawson – once again - I have measured this on site and have copied the 1996 plans across to you twice already (attached again for your use) and I have explained during our meeting that the base and height of the structure are compliant...this is the end of the matter as far as I am concerned

Please do not email me again.

Regards  
Principal Planning Officer

---

Four hours later I receive a mail from the Chairman of the TGA asking that I do not use the TGA as a platform to communicate with the town hall.

*At this point I decided there were no authorised plans that could support the statement that the structure had been made legally and that a drawing that possibly showed otherwise was not being made available. I also decide to dismiss the TGA as it is becoming apparent that the Chairman with the aid of some of the other Committee Members is not running to an agenda that is in accordance with the stated aims of the TGA and wishes of the local residents.*
