Dear Rebecca,

Part-way through, writing about Hayley Johnson the Corporate Lead, Part II, I realised that I take much for granted when talking about plans and drawings and the various misrepresentations made of them by the Council. I've tried to summarise what I have been saying since January 2014 when I first complained that the enclosure was not being built to plan and it is the first attachment - UKDocksPlans.pdf. The other attachments are drawings to which I have referred.

You already have copies of the exchange where Mrs Johnson has misinformed the MP for Berwick and now you have an explanation of the drawings so I can go on to explain to you how she has branded me unfairly as a trouble maker.

I also consider her response to Anne-Marie Trevelyan to be reprehensible especially as she cannot provide any evidence to prove me wrong.

What is happening that she wants to silence me for six months, one might ask? My initial thoughts were that UK Docks want to extend their enclosure without anyone being able to make a complaint but I think, perhaps, one of the main offenders retires at the end of the financial year. My money is on the building inspector who should have surveyed the works properly in 2001.

The responses I have had from the Council point to that and so does the confidence with which UK Docks misinformed the planning office with their deceptive plans. It is probably criminal fraud but the police do not pursue planning matters and the Council are unlikely to act because it will expose of the conduct their staff.

This brings me to the conspiracy of silence surrounding the the UK Docks development and it is beginning to look like Mrs Haley Johnson has been appointed by the Chief Executive to enforce it.

Yours sincerely
Michael Dawson
