Hi Mick

I appreciate your arguments, but this far down the line there is nothing we can do. Angela has talked to several relevant people, and the point is the council gave retrospective planning. Which they are allowed to do. We are working with Angela to negate further issues with the site. It's all we can do now: limit noise and any other issues if they occur.

Regards

Julie Routledge

Subject: UK Docks / Harbour View Residents Concerns

Julie,

You have totally missed the point, well 2 actually: When the footings were set in 2001 they were a meter wider than planned. Which is not a slight variation from the plan. Even the Council admitted that to us when Mr Mansbridge responded to our Petition.

Anyone who tells you otherwise is therefore lying. The shed is 2.7 meter higher than planned and whoever tells you that the difference is only slight is also lying. Unfortunately for UK Docks the only approved plans from 1996 show the height of shed at the road end to be 12.7m. The built height at that point is 15.5m.

Ask anyone for proof that the shed is built to the approved height and they either change the subject or say that the difference is only slight. Planning Officer Cunningham has telling that lie since the beginning and you and Angela should be wary of repeating that the variation of the width, and especially the height, is of no consequence. It was because Mr Cunningham would not answer the question of height that we went through the fruitless exercise of raising the TGA.

Cheers

Mick
